Appl. No. 10/538,329 Reply to Office Action of May 25, 2007

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Currently Amended) An ink-jet recording method for recording images on a base material by jetting UV-setting ink-jet ink which contains at least color materials, <u>UV-polymeric</u> polymerizable compound, and photo-induced polymerization initiator in a water-based medium, onto the base material,

wherein ultraviolet rays are applied to the jetted inks within a contact time in which the rate of ink transfer to the base material is $\frac{\text{from 5 ml/mm}^2}{\text{less than to}}$ 20 ml/mm² by the Bristow method after the ink reaches the base material.

2. (Original) The ink-jet recording method of claim 1, wherein the ink transfer rate is 20 ml/mm.sup.2 or more when the contact time of the ink on the base material is 2 seconds by the Bristow

Appl. No. 10/538,329 Reply to Office Action of May 25, 2007

method.

- 3. (Original) The ink-jet recording method of claim 1, wherein the method further comprises a process of removing the water-based medium after hardening the ink by ultraviolet rays.
- 4. (Original) The ink-jet recording method of claim 2, wherein the method further comprises a process of removing the water-based medium after hardening the ink by ultraviolet rays.
